

## Instructions to install and configure Citrix Secure Hub and Secure Mail (iOS)

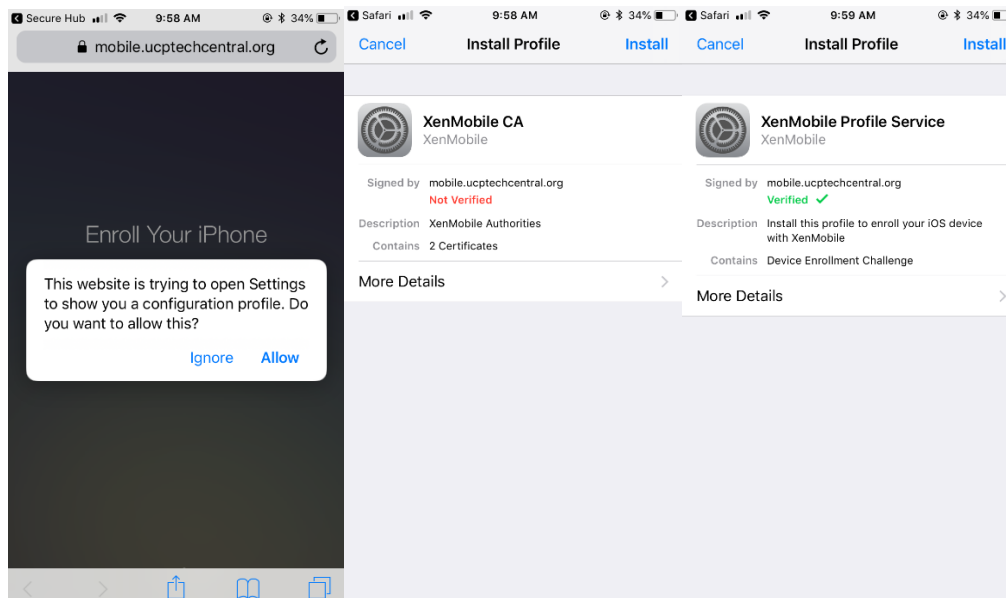

- 1) Go to the App Store on your phone and search for “Secure hub by citrix”. It will have a blue icon in front of it –

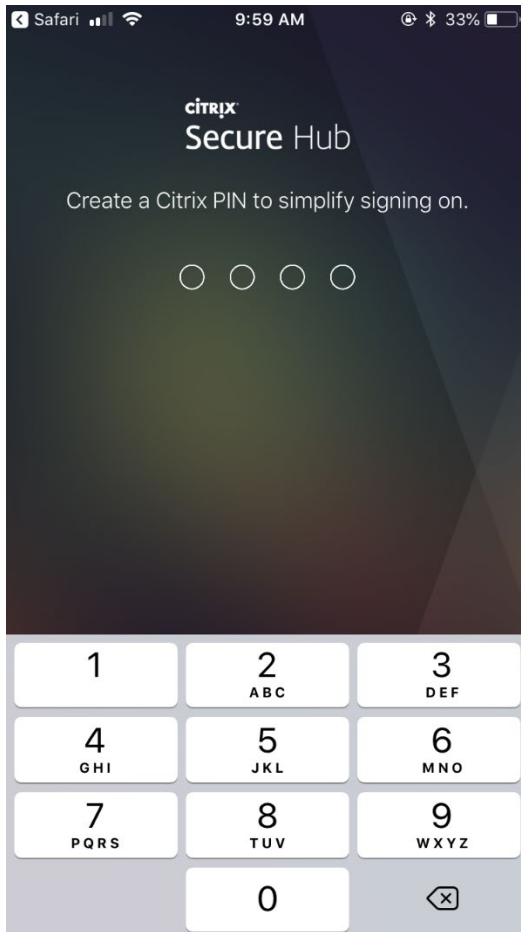

- 2) The URL is **mobile.ucptechcentral.org** and then tap ‘Next’

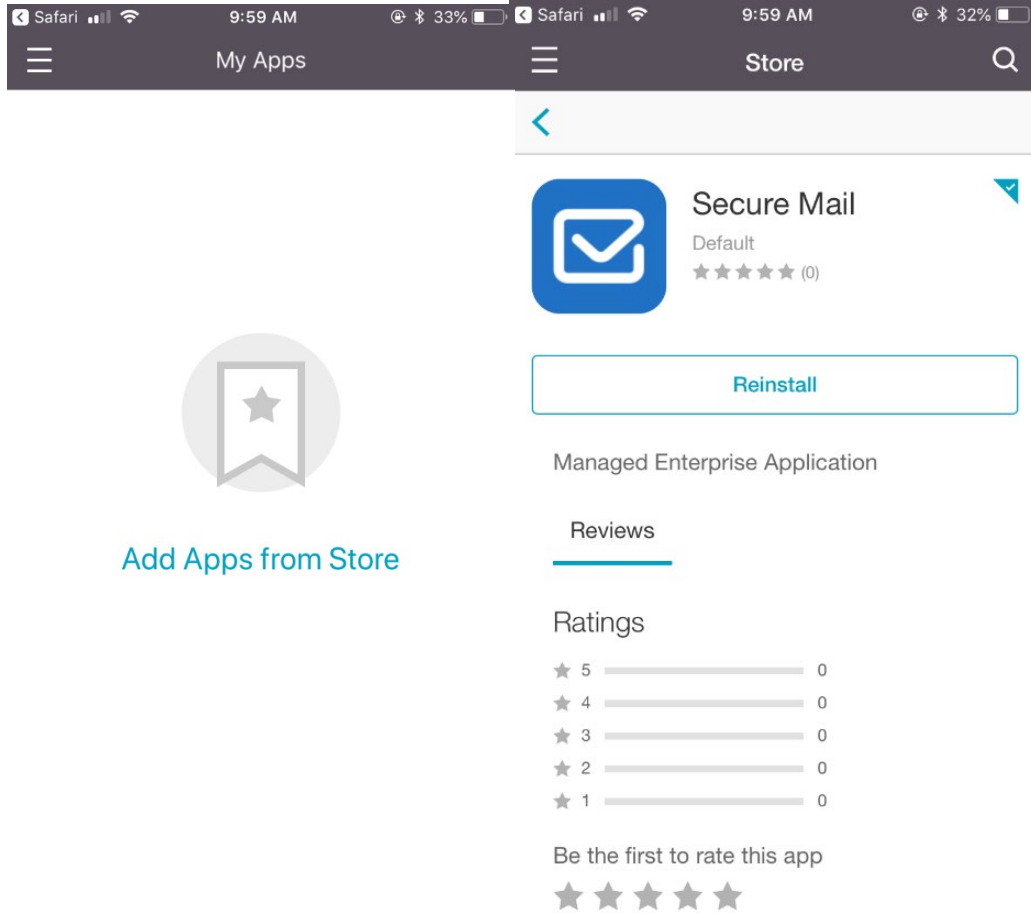

- 3) Enter in your username and password using the domain\user format (ucpmain\username)
- 4) It will install 2 certificates. (If you are reinstalling secure hub you need to remove these before installing)

5) Create and Confirm a PIN which will be used in place of your password.

- 6) Click on OK when asked to Use your current location.
- 7) Click on the Apps Store to open and see the applications that are available to install.

- 8) Select the 'SecureMail' icon and then 'Add' when the box appears.
- 9) Select "SecureWeb" icon and then 'Add' when the box appears.
- 10) Wait for the installs to complete.
- 11) Open Secure Mail for configuration.
