

InTune/Outlook for iPhone instructions

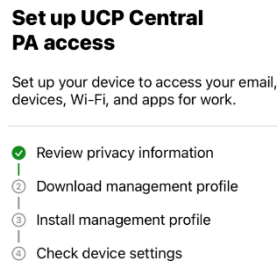

1. Open the IOS app store and search for **Intune Company Portal** and download the app.

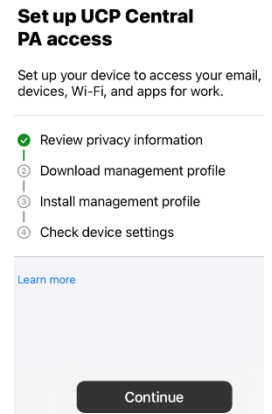

2. After it installs click on the icon on your iphone and log in with your UCP email and Password.

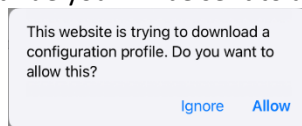

3. Follow the on screen steps for the app.

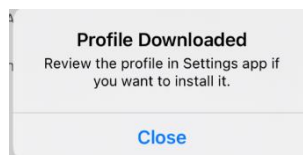

4. On step 2-3 you will need to download and install the management profile.

5. When you hit continue you will be sent to a website and you will receive this Popup click allow.

6. You will get this popup next.

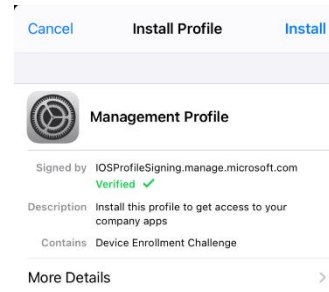

- When you click close you will have to leave the app and go to the settings app.
- When you enter the settings app you will see the following bar click on it.

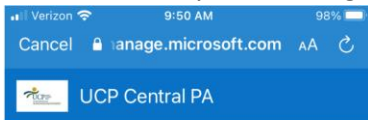

Profile Downloaded >

- Click on install and follow the prompts on your phone.

- After the install you need to go back to the install of the intune app and click continue

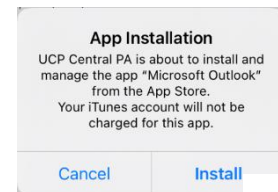

Download management profile

When prompted, select **Allow** to download the profile.

After it downloads, select **Done** to continue.

Downloaded the management profile? Continue now.

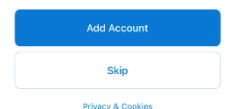

- You will be prompted to install Outlook. Click the install button.

1 Account Found

AppleIntune@ucpcentralpa.org
Office 365

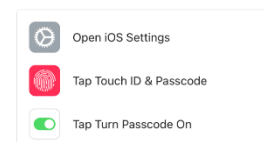

- Outlook will install on your Iphone. Open it when it installs and click on add account.

- If you do not have a password on your phone you will need to set one before you can continue.

iOS Passcode Required

appleintune@ucpcentralpa.org requires that a passcode is set on this device. Here's how to create a passcode:

If you don't want to create a passcode on this device, you can skip this step.

14. After you set as password Outlook will open and ask you if you want to enable notifications. You can choose what you prefer, and messages will begin to download. Your device will be in quarantine till IT approves it.
